EDUCATION

Mahatma Gandhi Institute of Technology

B. Tech, Computer Science; CGPA: 8.0

December 2021 – June 2025

Hyderabad, India

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, SQL, HTML5/CSS3

Frontend: React, Next.js, Tailwind CSS, Redux, Responsive Design, Vite

Backend: Node.js, Fastify, Express.js, Prisma, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis, DiceDB

DevOps & Cloud: Docker, Git/GitHub, CI/CD Pipelines, Vercel, Supabase, Turborepo, Serverless Deployment

Tools: Prisma ORM, Jira, GitLab, IntelliJ, Postman, GitHub Actions, SSH, Certbot, Cloudinary

Core Concepts: Data Structures & Algorithms, DBMS, System Design, OOPS, Microservices Architecture, Monorepo Management

PROFESSIONAL EXPERIENCE

Wednesday Solutions

March 2026 – Present

Software Development Engineer 1 (SDE-1)

Pune, India

- Built an AI-powered internal platform to manage and monitor project health across the entire organization, consolidating **DORA metrics**, NPS scores, project status, and team rankings into a unified dashboard.
- Engineered automated bi-weekly sprint reporting workflows using **n8n**, delivering AI-generated project health summaries to managers across all active projects and enabling proactive risk identification at scale.
- Integrated an AI layer to analyze cross-project data and surface actionable insights, significantly reducing manual status-tracking overhead for engineering leads and stakeholders.

Stalcon Solutions Private Limited

October 2025 – February 2026

Backend Developer (Full-Time)

Remote

- Transitioned to a full-time role following a successful internship, taking ownership of backend architecture and API development.
- Led development across multiple concurrent projects including **Amealio** and **SkillStride** (learning platform), ensuring scalable and modular codebases.
- Collaborated with cross-functional teams to design and implement robust server-side logic using Node.js, Fastify, and Prisma ORM.
- Optimized database schemas and query performance in PostgreSQL to support increasing user traffic and data complexity.

Stalcon Solutions Private Limited

July 2025 – September 2025

Backend Developer Intern

Remote

- Contributed to the backend of a production-ready learning platform built with NestJS and MongoDB, focusing on modular, secure, and scalable server architecture.
- Assisted in the migration of legacy components to modern backend architectures, improving maintainability and developer velocity.
- Participated in regular code reviews and technical knowledge transfer sessions to align with industry best practices.

EazyByts Web Solutions

August 2024 – February 2025

Web Developer Intern [Certificate]

Remote

- Completed a comprehensive 7-month internship program, gaining hands-on experience in full-stack development.
- Developed a feature-rich Stock Market Dashboard using React, HTML5, CSS3, and JavaScript with real-time data integration.
- Implemented interactive portfolio management system with performance tracking and data visualization components.
- Designed responsive UI/UX ensuring cross-device compatibility and optimal user experience across multiple screen sizes.

PROJECTS

CartVerse — Full-Stack E-Commerce Platform | *Live Demo* **January 2025**

- Built a production-ready e-commerce platform using React (Vite), TailwindCSS, TanStack Query, and Framer Motion.
- Architected scalable backend with **Fastify**, PostgreSQL (Supabase), and Prisma ORM following MVC architecture.
- Implemented secure JWT-based authentication using **Lucia Auth** with session management and role-based access control.

Airbnb Clone — Hotel Booking Platform | *Live Demo* **April 2023 – August 2023**

- Developed a comprehensive hotel booking platform with multi-authentication (Google, GitHub) and advanced filtering.
- Implemented conflict prevention system for reservations using database constraints and real-time availability checking.

TECHNICAL WRITING

Full-Stack Monorepo Development Guide

 Published on Hashnode

- Authored comprehensive technical guide covering modern monorepo setup with Turborepo, Vite/React, Fastify, and Prisma.
