EDUCATION

Mahatma Gandhi Institute of Technology

B. Tech, Computer Science; CGPA: 8.0

December 2021 – June 2025

Hyderabad, India

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, SQL, HTML5/CSS3

Frontend: React, Next.js, Tailwind CSS, Redux, Responsive Design, Vite, Unit Testing (Jest/RTL)

Backend: Node.js, Fastify, Express.js, NestJS, Prisma, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Cloud: Docker, Kubernetes, Git/GitHub, CI/CD Pipelines, GitHub Actions, Vercel, AWS, IBM Cloud, Serverless Deployment

Tools: Prisma ORM, Jira, GitLab, IntelliJ IDEA, Postman, SSH, Linux, Maven/Gradle

Core Concepts: Data Structures & Algorithms, DBMS, System Design, OOP, Microservices, Agile/TDD, SaaS Development, Monorepo Management

PROFESSIONAL EXPERIENCE

Wednesday Solutions

March 2026 – Present

Software Development Engineer 1 (SDE-1)

Pune, India

- Built an AI-powered internal **SaaS platform** to manage and monitor project health across the organization, consolidating **DORA metrics**, NPS scores, project status, and team rankings into a unified dashboard with an intuitive React frontend.
- Engineered automated bi-weekly sprint reporting workflows using **n8n**, delivering AI-generated project health summaries to managers and enabling proactive risk identification at scale.
- Designed and implemented **responsive UI components** using React and TypeScript, ensuring cross-device compatibility and high-quality user experience across SaaS and hybrid cloud environments.
- Participated in **code reviews**, contributed to design discussions, and aligned development practices with Agile/CI/CD workflows using GitHub Actions and Docker.

Stalcon Solutions Private Limited

May 2025 – February 2026

Backend Developer (Intern → Full-Time)

Remote

- Progressed from intern to full-time role, taking ownership of backend architecture and API development for production platforms including **Amealio** and **SkillStride** (learning platform).
- Developed and maintained full-stack features using **React**, **NestJS**, and **MongoDB**, contributing to both client-side and server-side development lifecycles on SaaS applications.
- Integrated third-party APIs and implemented **UI with API integration** patterns, ensuring robust data flow between frontend components and backend services.
- Authored and executed **automated test cases** and participated in regular code reviews to uphold software quality and developer velocity across multiple concurrent projects.
- Optimized **PostgreSQL** database schemas and query performance to handle increasing user traffic, and assisted in migrating legacy components to modern, modular architectures.

EazyByts Web Solutions

August 2024 – February 2025

Web Developer Intern [Certificate]

Remote

- Developed a feature-rich **Stock Market Dashboard** using **React**, **HTML5**, **CSS3**, and **JavaScript** with real-time data integration, demonstrating strong frontend development capabilities.
- Implemented **interactive portfolio management system** with performance tracking and data visualization components, ensuring responsive design across multiple screen sizes.
- Designed **responsive UI/UX** ensuring cross-device compatibility, applying industry best practices for accessible and standards-compliant front-end development.

PROJECTS

CartVerse — Full-Stack E-Commerce Platform | *Live Demo* | *GitHub* January 2025

- Built a production-ready e-commerce platform using **React** (Vite), TailwindCSS, TanStack Query, and Framer Motion, with a focus on responsive design and high industry-standard UI/UX.
- Architected scalable backend with **Fastify**, PostgreSQL (Supabase), and Prisma ORM following MVC architecture; implemented secure **JWT-based authentication** with role-based access control.
- Configured **CI/CD pipelines** and serverless deployment on Vercel, demonstrating end-to-end ownership of a SaaS-style application.

Airbnb Clone — Hotel Booking Platform | *Live Demo* | *GitHub* April 2023 – August 2023

- Developed a comprehensive hotel booking platform with **multi-authentication** (Google, GitHub), advanced filtering, and real-time reservation conflict prevention using database constraints.
- Applied **Test Driven Development** principles and version control best practices using GitHub throughout the project lifecycle.

TECHNICAL WRITING

Full-Stack Monorepo Development Guide

 Published on Hashnode

- Authored comprehensive technical guide covering modern monorepo setup with Turborepo, Vite/React, Fastify, and Prisma, demonstrating strong technical documentation skills.
